# REX AMERICAN RESOURCES CORPORATION AND SUBSIDIARIES

## NOTES TO UNAUDITED CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

October 31, 2016

### **Note 1. Consolidated Condensed Financial Statements**

The consolidated condensed financial statements included in this report have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission and include, in the opinion of management, all adjustments necessary to state fairly the information set forth therein. Any such adjustments were of a normal recurring nature. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading. Financial information as of January 31, 2016 included in these financial statements has been derived from the audited consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended January 31, 2016 (fiscal year 2015). It is suggested that these unaudited consolidated condensed financial statements be read in conjunction with the consolidated financial statements and the notes thereto included in the Company's Annual Report on Form 10-K for the year ended January 31, 2016. The results of operations for the interim periods are not necessarily indicative of the results to be expected for the year.

**Basis of Consolidation** – The consolidated condensed financial statements in this report include the operating results and financial position of REX American Resources Corporation and its wholly and majority owned subsidiaries. All intercompany balances and transactions have been eliminated. The Company includes the results of operations of One Earth Energy, LLC (“One Earth”) in its Consolidated Condensed Statements of Operations on a delayed basis of one month.

**Nature of Operations** – The Company operates in one reportable segment, alternative energy, and has equity investments in three ethanol limited liability companies, two of which are majority ownership interests.

### **Note 2. Accounting Policies**

The interim consolidated condensed financial statements have been prepared in accordance with the accounting policies described in the notes to the consolidated financial statements included in the Company's fiscal year 2015 Annual Report on Form 10-K. While management believes that the procedures followed in the preparation of interim financial information are reasonable, the accuracy of some estimated amounts is dependent upon facts that will exist or calculations that will be accomplished at fiscal year-end. Examples of such estimates include accrued liabilities, such as management bonuses, and the provision for income taxes. Any adjustments pursuant to such estimates during the quarter were of a normal recurring nature. Actual results could differ from those estimates.

## **Revenue Recognition**

The Company recognizes sales from the production of ethanol, distillers grains and non-food grade corn oil when title transfers to customers, generally upon shipment from the ethanol plant or upon loading of the rail car used to transport the products.

## **Cost of Sales**

Cost of sales includes direct production costs and certain overhead costs such as depreciation, property taxes and utilities related to producing ethanol and related by-products.

## **Selling, General and Administrative Expenses**

The Company includes non-production related costs such as professional fees, selling charges and certain payroll in selling, general and administrative expenses.

## **Financial Instruments**

Certain of the forward grain purchase and ethanol, distillers grains and non-food grade corn oil sale contracts are accounted for under the “normal purchases and normal sales” scope exemption of Accounting Standards Codification (“ASC”) 815, “*Derivatives and Hedging*” because these arrangements are for purchases of grain that will be delivered in quantities expected to be used by the Company and sales of ethanol, distillers grains and non-food grade corn oil quantities expected to be produced by the Company over a reasonable period of time in the normal course of business. During fiscal year 2015, the Company began to carry a portion of its forward grain purchase contracts at fair value.

The Company uses derivative financial instruments (exchange-traded futures contracts) to manage a portion of the risk associated with changes in commodity prices, primarily related to corn. The Company monitors and manages this exposure as part of its overall risk management policy. As such, the Company seeks to reduce the potentially adverse effects that the volatility of these markets may have on its operating results. The Company may take hedging positions in these commodities as one way to mitigate risk. While the Company attempts to link its hedging activities to purchase and sales activities, there are situations in which these hedging activities can themselves result in losses. The Company does not hold or issue derivative financial instruments for trading or speculative purposes. The changes in fair value of these derivative financial instruments are recognized in current period earnings as the Company does not use hedge accounting.

## **Income Taxes**

The Company applies an effective tax rate to interim periods that is consistent with the Company’s estimated annual tax rate as adjusted for discrete items impacting the interim periods. The Company provides for deferred tax liabilities and assets for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis and operating loss and tax credit carryforwards. The Company provides for a valuation allowance if, based on the weight of available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. The Company paid income taxes of approximately \$5,060,000 and \$19,703,000

during the nine months ended October 31, 2016 and 2015, respectively. The Company received no refunds of income taxes during the nine months ended October 31, 2016. The Company received refunds of state income taxes of approximately \$132,000 during the nine months ended October 31, 2015.

As of October 31, 2016 and January 31, 2016, total unrecognized tax benefits were approximately \$2,029,000 and \$987,000, respectively. Accrued penalties and interest were approximately \$198,000 at October 31, 2016. There were no accrued penalties and interest at January 31, 2016. If the Company were to prevail on all unrecognized tax benefits recorded, the provision for income taxes would be reduced by approximately \$1,319,000. In addition, the impact of penalties and interest would also benefit the effective tax rate. Interest and penalties associated with unrecognized tax benefits are recorded within income tax expense. On a quarterly basis, the Company accrues for the effects of open uncertain tax positions and the related potential penalties and interest.

## Inventories

Inventories are carried at the lower of cost or market on a first-in, first-out basis. Inventory includes direct production costs and certain overhead costs such as depreciation, property taxes and utilities related to producing ethanol and related by-products. Inventory is permanently written down for instances when cost exceeds estimated net realizable value; such write-downs are based primarily upon commodity prices as the market value of inventory is often dependent upon changes in commodity prices. There were no significant permanent write-downs of inventory at October 31, 2016 and January 31, 2016. Fluctuations in the write-down of inventory generally relate to the levels and composition of such inventory at a given point in time. The components of inventory are as follows as of the dates presented (amounts in thousands):

	October 31, 2016	January 31, 2016
Ethanol and other finished goods	\$ 3,470	\$ 3,105
Work in process	2,740	2,652
Grain and other raw materials	13,273	11,421
Total	<u>\$ 19,483</u>	<u>\$ 17,178</u>

## Property and Equipment

Property and equipment is recorded at cost. Depreciation is computed using the straight-line method. Estimated useful lives are 15 to 40 years for buildings and improvements, and 2 to 20 years for fixtures and equipment.

In accordance with ASC 360-10 "*Impairment or Disposal of Long-Lived Assets*", the carrying value of long-lived assets is assessed for recoverability by management when changes in circumstances indicate that the carrying amount may not be recoverable, based on an analysis of undiscounted future expected cash flows from the use and ultimate disposition of the asset. There were no impairment charges in the first nine months of fiscal year 2016 and approximately \$125,000 of impairment charges in the first nine months of fiscal year 2015, included in cost of sales in the accompanying Consolidated Condensed Statement of Operations. The impairment charges are related to unfavorable changes in real estate

conditions in local markets. Impairment charges result from the Company's management performing cash flow analysis and represent management's estimate of the excess of net book value over fair value.

The Company tests for recoverability of an asset group by comparing its carrying amount to its estimated undiscounted future cash flows. If the carrying amount of an asset group exceeds its estimated undiscounted future cash flows, the Company recognizes an impairment charge for the amount by which the asset group's carrying amount exceeds its fair value, if any. The Company generally determines the fair value of the asset group using a discounted cash flow model based on market participant assumptions (for income producing asset groups) or by obtaining appraisals based on the market approach and comparable market transactions (for non-income producing asset groups).

## **Investments**

The method of accounting applied to long-term investments, whether consolidated, equity or cost, involves an evaluation of the significant terms of each investment that explicitly grant or suggest evidence of control or influence over the operations of the investee and also includes the identification of any variable interests in which the Company is the primary beneficiary. The Company consolidates the results of two majority owned subsidiaries, One Earth and NuGen. The results of One Earth are included on a delayed basis of one month lag as One Earth has a fiscal year end of December 31. NuGen has the same fiscal year as the parent, and therefore, there is no lag in reporting the results of NuGen. The Company accounts for investments in a limited liability company in which it has a less than 20% ownership interest, using the equity method of accounting when the factors discussed in ASC 323, "*Investments-Equity Method and Joint Ventures*" are met. The excess of the carrying value over the underlying equity in the net assets of equity method investees is allocated to specific assets and liabilities. Any unallocated excess is treated as goodwill and is recorded as a component of the carrying value of the equity method investee. Investments in businesses that the Company does not control but for which it has the ability to exercise significant influence over operating and financial matters are accounted for using the equity method. The Company accounts for its investment in Big River Resources, LLC ("Big River") using the equity method of accounting and includes the results on a delayed basis of one month as Big River has a fiscal year end of December 31. The Company accounted for its investment in Patriot Holdings, LLC ("Patriot") (through May 31, 2015 – see Note 10 for a discussion of the sale of the Company's equity interest in Patriot) using the equity method of accounting and included the results on a delayed basis of one month as Patriot had a fiscal year end of December 31.

The Company periodically evaluates its investments for impairment due to declines in market value considered to be other than temporary. Such impairment evaluations include general economic and company-specific evaluations. If the Company determines that a decline in market value is other than temporary, then a charge to earnings is recorded in the Consolidated Condensed Statements of Operations and a new cost basis in the investment is established.

## **Comprehensive Income**

The Company has no components of other comprehensive income, and therefore, comprehensive income equals net income.

## Accounting Changes and Recently Issued Accounting Standards

In March 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2016-09, “*Improvements to Employee share-Based Payment Accounting*”. This standard simplifies the accounting treatment for excess tax benefits and deficiencies, forfeitures, and cash flow considerations related to share-based compensation. This standard is effective for annual and interim periods beginning after December 15, 2016. The Company has not determined the effect of this standard on its consolidated financial statements and related disclosures.

In January 2016, the FASB issued ASU 2016-01. “*Recognition and Measurement of Financial Assets and Financial Liabilities*”. This standard provides guidance for the recognition, measurement, presentation and disclosure of financial instruments. This ASU is effective for annual and interim periods beginning after December 15, 2017, and early adoption is not permitted. The Company has not determined the effect of this standard on its consolidated financial statements and related disclosures.

In February 2016, the FASB issued ASU 2016-02 “*Leases*”. This standard requires that virtually all leases will be recognized by lessees on their balance sheet as a right-of-use asset and a corresponding lease liability, including leases currently accounted for as operating leases. The Company will be required to adopt this standard effective February 1, 2019. The Company has not determined the effect of this standard on its consolidated financial statements and related disclosures.

In August 2016, the FASB issued ASU 2016-15 “*Statement of Cash Flows (Topic 230), Classification of Certain Cash Receipts and Cash Payments*”. This standard provides guidance on eight specific cash flow issues. The cash flow issues covered by this ASU are: 1) debt prepayment or debt extinguishment costs; 2) settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing; 3) contingent consideration payments made after a business combination; 4) proceeds from the settlement of insurance claims; 5) proceeds from the settlement of corporate-owned life insurance policies, including bank-owned life insurance policies; 6) distributions received from equity method investees; 7) beneficial interests in securitization transactions; and 8) separately identifiable cash flows and application of the predominance principle for distributions received from equity method investees in the Statement of Cash Flows. The Company will be required to adopt this standard effective February 1, 2018. The Company has not determined the effect of this standard on its consolidated financial statements and related disclosures.

**Note 3. Leases**

At October 31, 2016, the Company has lease agreements, as lessee, for rail cars and a natural gas pipeline. All of the leases are accounted for as operating leases. The following table is a summary of future minimum rentals on such leases (amounts in thousands):

Years Ended January 31,	Minimum Rentals
Remainder of 2017	\$ 1,845
2018	6,650
2019	5,872
2020	4,341
2021	2,778
Thereafter	4,169
Total	<u>\$ 25,655</u>

**Note 4. Fair Value**

The Company applies ASC 820, “*Fair Value Measurements and Disclosures*”, (“ASC 820”) which provides a framework for measuring fair value under accounting principles generally accepted in the United States of America. This accounting standard defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

The Company determines the fair market values of its financial instruments based on the fair value hierarchy established by ASC 820 which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair values which are provided below. The Company carries certain cash equivalents, investments and derivative instruments at fair value.

The fair values of derivative assets and liabilities traded in the over-the-counter market are determined using quantitative models that require the use of multiple market inputs including interest rates, prices and indices to generate pricing and volatility factors, which are used to value the position. The predominance of market inputs are actively quoted and can be validated through external sources, including brokers, market transactions and third-party pricing services. Estimation risk is greater for derivative asset and liability positions that are either option-based or have longer maturity dates where observable market inputs are less readily available or are unobservable, in which case interest rate, price or index scenarios are extrapolated in order to determine the fair value. The fair values of derivative assets and liabilities include adjustments for market liquidity, counterparty credit quality, the Company’s own credit standing and other specific factors, where appropriate. The fair values of property and equipment are determined by using various models that discount future expected cash flows.

To ensure the prudent application of estimates and management judgement in determining the fair value of derivative assets and liabilities, investments and property and equipment, various processes and controls have been adopted, which include: (i) model validation that requires a review and approval for

pricing, financial statement fair value determination and risk quantification; and (ii) periodic review and substantiation of profit and loss reporting for all derivative instruments. Financial assets and liabilities measured at fair value on a recurring basis at October 31, 2016 are summarized below (amounts in thousands):

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Fair Value</u>
Commodity futures (1)	\$ 87	\$ —	\$ —	\$ 87
Investment in cooperative (2)	<u>—</u>	<u>—</u>	<u>333</u>	<u>333</u>
Total assets	<u>\$ 87</u>	<u>\$ —</u>	<u>\$ 333</u>	<u>\$ 420</u>
Forward purchase contract liability (3)	<u>\$ —</u>	<u>\$ 408</u>	<u>\$ —</u>	<u>\$ 408</u>

Financial assets and liabilities measured at fair value on a recurring basis at January 31, 2016 are summarized below (amounts in thousands):

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Fair Value</u>
Investment in cooperative (2)	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 333</u>	<u>\$ 333</u>
Forward purchase contracts liability (3)	<u>\$ —</u>	<u>\$ 312</u>	<u>\$ —</u>	<u>\$ 312</u>

(1) Commodity futures are included in “Prepaid expenses and other current assets” on the accompanying Consolidated Condensed Balance Sheets.

(2) The investment in cooperative is included in “Other assets” on the accompanying Consolidated Condensed Balance Sheets.

(3) The forward purchase contract liability is included in “Accrued expenses and other current liabilities” on the accompanying Consolidated Condensed Balance Sheets.

The Company determined the fair value of the investment in cooperative by using a discounted cash flow analysis on the expected cash flows. Inputs used in the analysis include the face value of the allocated equity amount, the projected term for repayment based upon a historical trend, and a risk adjusted discount rate based on the expected compensation participants would demand because of the uncertainty of the future cash flows. The inherent risk and uncertainty associated with unobservable inputs could have a significant effect on the actual fair value of the investment.

There were no assets measured at fair value on a non-recurring basis at October 31, 2016 or January 31, 2016.

**Note 5. Property and Equipment**

The components of property and equipment are as follows for the periods presented (amounts in thousands):

	October 31, 2016	January 31, 2016
Land and improvements	\$ 20,951	\$ 21,598
Buildings and improvements	23,197	24,543
Machinery, equipment and fixtures	252,722	237,735
Construction in progress	2,229	6,094
	<u>299,099</u>	<u>289,970</u>
Less: accumulated depreciation	(112,880)	(99,994)
Total	<u>\$ 186,219</u>	<u>\$ 189,976</u>

**Note 6. Other Assets**

The components of other assets are as follows for the periods presented (amounts in thousands):

	October 31, 2016	January 31, 2016
Real estate taxes refundable	\$ 5,186	\$ 5,091
Deposits	205	664
Other	1,041	887
Total	<u>\$ 6,432</u>	<u>\$ 6,642</u>

Real estate taxes refundable represent amounts due One Earth associated with refunds of previously paid taxes in connection with a tax increment financing arrangement with local taxing authorities. Deposits are with utility and other vendors.

**Note 7. Accrued Expenses and Other Current Liabilities**

The components of accrued expenses and other current liabilities are as follows for the periods presented (amounts in thousands):

	October 31, 2016	January 31, 2016
Accrued utility charges	\$ 1,947	\$ 2,094
Accrued payroll and related items	2,884	3,760
Accrued income taxes	3,187	—
Accrued real estate taxes	1,188	2,564
Other	1,669	1,005
Total	<u>\$ 10,875</u>	<u>\$ 9,423</u>

**Note 8. Revolving Lines of Credit**

Effective April 1, 2016, One Earth and NuGen each entered into \$10.0 million revolving loan facilities that mature April 1, 2017. Any borrowings will be secured by the inventory and accounts receivable of One Earth or NuGen, specific to which entity borrows money under these facilities. These revolving loan facilities are recourse only to One Earth and NuGen and not to REX American Resources Corporation or any of its other subsidiaries. Borrowings under these facilities bear interest at the one month LIBOR rate plus 250 basis points. Neither One Earth nor NuGen had outstanding borrowings on the revolving loans during the nine months ended October 31, 2016. One Earth and NuGen are also subject to certain financial covenants under the revolving loan facilities, including working capital requirements, should they borrow on the loans.

**Note 9. Derivative Financial Instruments**

The Company is exposed to various market risks, including changes in commodity prices (raw materials and finished goods). To manage risks associated with the volatility of these natural business exposures, the Company enters into commodity agreements and forward purchase (corn) and sale (ethanol, distillers grains and non-food grade corn oil) contracts. The Company does not purchase or sell derivative financial instruments for trading or speculative purposes. The Company does not purchase or sell derivative financial instruments for which a lack of marketplace quotations would require the use of fair value estimation techniques.

The following table provides information about the fair values of the Company's derivative financial instruments and the line items on the Consolidated Condensed Balance Sheets in which the fair values are reflected (in thousands):

	Asset Derivatives Fair Value		Liability Derivatives Fair Value	
	October 31, 2016	January 31, 2016	October 31, 2016	January 31, 2016
Commodity futures (1)	\$ 87	\$ —	\$ —	\$ —
Forward purchase contracts (2)	\$ —	\$ —	\$ 408	\$ 312

(1) Commodity futures are included in other prepaid expense and other current assets. These futures contracts are for approximately 0.3 million bushels at October 31, 2016.

(2) Forward purchase contracts are included in accrued expenses and other current liabilities. These contracts are for purchases of approximately 4.5 million and approximately 0.7 million bushels of corn at October 31, 2016 and January 31, 2016, respectively.

As of October 31, 2016, all of the derivative financial instruments held by the Company were subject to enforceable master netting arrangements. The Company's accounting policy is to offset positions amounts owed or owing with the same counterparty. As of October 31, 2016, the gross positions of the enforceable master netting agreements are not significantly different from the net positions presented in the table above. Depending on the amount of an unrealized loss on a derivative contract held by the Company, the counterparty may require collateral to secure the Company's derivative contract position. As of October 31, 2016, the Company was required to maintain collateral with the counterparty in the amount of approximately \$46,000 to secure the Company's derivative liability position.

See Note 4 which contains fair value information related to derivative financial instruments.

Gains of approximately \$115,000 and \$108,000 for the third quarters of fiscal years 2016 and 2015, respectively, on the Company's derivative financial instruments were included in cost of sales on the Consolidated Condensed Statements of Operations. Gains of approximately \$1,740,000 and \$184,000 for the first nine months of fiscal years 2016 and 2015, respectively, on the Company's derivative financial instruments were included in cost of sales on the Consolidated Condensed Statements of Operations.

**Note 10. Investments**

The following table summarizes the equity method investment at October 31, 2016 and January 31, 2016 (dollars in thousands):

Entity	Ownership Percentage	Carrying Amount October 31, 2016	Carrying Amount January 31, 2016
Big River	9.7%	\$ 37,954	\$ 38,707

The following table summarizes income recognized from equity method investments for the periods presented (dollars in thousands):

	Three Months Ended October 31,		Nine Months Ended October 31,	
	2016	2015	2016	2015
Big River	\$ 1,838	\$ 1,314	\$ 3,257	\$ 4,910
Patriot (sold June 1, 2015)	—	—	—	2,947
<b>Total</b>	<b>\$ 1,838</b>	<b>\$ 1,314</b>	<b>\$ 3,257</b>	<b>\$ 7,857</b>

Undistributed earnings of the equity method investee totaled approximately \$17.9 million and \$18.7 million at October 31, 2016 and January 31, 2016, respectively. During the first nine months of fiscal years 2016 and 2015, the Company received dividends from equity method investees of approximately \$4.0 million and \$7.6 million, respectively.

Summarized financial information for each of the Company's equity method investees is presented in the following table for the periods presented (amounts in thousands):

	Three Months Ended October 31, 2016		Three Months Ended October 31, 2015	
	Patriot (1)	Big River	Patriot (1)	Big River
Net sales and revenue	\$ —	\$ 216,505	\$ —	\$ 215,902
Gross profit	\$ —	\$ 26,191	\$ —	\$ 22,078
Income from continuing operations	\$ —	\$ 18,934	\$ —	\$ 13,540
Net income	\$ —	\$ 18,934	\$ —	\$ 13,540

	Nine Months Ended October 31, 2016		Nine Months Ended October 31, 2015	
	Patriot (1)	Big River	Patriot (1)	Big River
Net sales and revenue	\$ —	\$ 611,050	\$ 115,614	\$ 623,900
Gross profit	\$ —	\$ 49,119	\$ 14,424	\$ 71,345
Income from continuing operations	\$ —	\$ 33,555	\$ 11,100	\$ 50,580
Net income	\$ —	\$ 33,555	\$ 11,100	\$ 50,580

(1) The Company's equity interest in Patriot was sold June 1, 2015; therefore results are for the five month period ended May 31, 2015.

Big River has debt agreements that limit amounts Big River can pay in the form of dividends or advances to owners. The restricted net assets of Big River at October 31, 2016 and January 31, 2016 are approximately \$298.9 million and \$306.3 million, respectively.

On June 1, 2015, Patriot and a subsidiary of CHS Inc. ("CHS") completed a merger that resulted in CHS acquiring 100% of the ownership interest in Patriot. During fiscal year 2015, the Company received a cash payment of approximately \$45.5 million at the closing, representing its proportionate share of the merger consideration for its 27% ownership interest. The total merger consideration was approximately \$196 million in cash subject to certain adjustments and certain escrow holdbacks. In connection with this transaction, the Company recognized a gain of approximately \$10.4 million during the second quarter of fiscal year 2015. During the first quarter of fiscal year 2016, the Company received proceeds of approximately \$2.3 million as partial payment for certain escrow holdbacks and adjustments to the purchase price. As a result, the Company recognized approximately \$0.2 million as gain on sale of investment during the first quarter of fiscal year 2016. At October 31, 2016, the Company has approximately \$2.3 million (recognized as gain in fiscal year 2015) in accounts receivable on the accompanying Consolidated Condensed Balance Sheet related to estimated escrow proceeds that were recognized as income. The Company expects that a determination of the final payment of escrowed proceeds to be received will occur by December 1, 2016.

#### **Note 11. Income Taxes**

The effective tax rate on consolidated pre-tax income was 33.3% for the three months ended October 31, 2016, and 14.8% for the three months ended October 31, 2015. The effective tax rate on consolidated pre-tax income was 32.9% for the nine months ended October 31, 2016, and 28.1% for the nine months ended October 31, 2015. The fluctuation in the effective tax rate primarily relates to the release of valuation allowances against capital loss carryforwards, the domestic production activities deduction, a change in the apportionment of income to certain states, the expiration of statutes for years with uncertain tax positions and a decrease in state income tax rates. These items reduced the effective tax rate approximately 17% for the quarter ended October 31, 2015 and approximately 7% for the nine months ended October 31, 2015. The provision for uncertain tax positions increased the effective tax rate approximately 1.9% and 1.4% for the quarter and nine months ended October 31, 2016, respectively.

The Company files a U.S. federal income tax return and income tax returns in various states. In general, the Company is no longer subject to U.S. federal, state or local income tax examinations by tax authorities for years ended January 31, 2010 and prior. A reconciliation of the beginning and ending amount of unrecognized tax benefits, including interest and penalties, is as follows (amounts in thousands):

Unrecognized tax benefits, January 31, 2016	\$ 987
Changes for prior years' tax positions	749
Changes for current year tax positions	491
Unrecognized tax benefits, October 31, 2016	<u>\$ 2,227</u>

**Note 12. Commitments and Contingencies**

The Company is involved in various legal actions arising in the normal course of business. After taking into consideration legal counsels' evaluations of such actions, management is of the opinion that their outcome will not have a material adverse effect on the Company's Consolidated Condensed Financial Statements.

One Earth and NuGen have combined forward purchase contracts for approximately 7.6 million bushels of corn, the principal raw material for their ethanol plants. They expect to take delivery of the grain through February 2017.

One Earth and NuGen have combined sales commitments for approximately 29.6 million gallons of ethanol, approximately 94,000 tons of distillers grains and approximately 12.3 million pounds of non-food grade corn oil. They expect to deliver the ethanol, distillers grains and non-food grade corn oil through January 2017.

**Note 13. Net Sales and Revenue**

The following table summarizes sales for each product and service group for the periods presented (amounts in thousands):

Product or Service Category	Three Months Ended		Nine Months Ended	
	October 31,		October 31,	
	2016	2015	2016	2015
Ethanol	\$ 90,702	\$ 82,767	\$ 259,266	\$ 248,329
Dried distillers grains	19,551	22,518	55,551	64,354
Non-food grade corn oil	5,074	3,994	13,658	12,002
Modified distillers grains	853	1,108	3,400	4,109
Other	103	197	337	467
Total	<u>\$ 116,283</u>	<u>\$ 110,584</u>	<u>\$ 332,212</u>	<u>\$ 329,261</u>

**Note 14. Related-Party Transactions**

During the third quarters of fiscal year 2016 and 2015, One Earth and NuGen purchased approximately \$34.2 million and approximately \$38.1 million, respectively, of corn from minority equity

investors and board members of those subsidiaries. Such purchases totaled approximately \$114.6 million and approximately \$114.4 million for the nine months ended October 31, 2016 and 2015, respectively.

**Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations**

At October 31, 2016, we had equity investments in three ethanol limited liability companies, two of which we have a majority ownership interest in. The following table is a summary of ethanol gallons shipped at our plants:

Entity	Trailing 12 Months Ethanol Gallons Shipped	REX’s Current Effective Ownership Interest	Current Effective Ownership of Trailing 12 Months Ethanol Gallons Shipped
One Earth Energy, LLC	119.1 M	75.0%	89.3 M
NuGen Energy, LLC	124.5 M	99.5%	123.9 M
Big River Resources, LLC:			
Big River Resources W Burlington, LLC	107.1 M	9.7%	10.4 M
Big River Resources Galva, LLC	126.1 M	9.7%	12.2 M
Big River United Energy, LLC	126.9 M	5.4%	6.9 M
Big River Resources Boyceville, LLC	57.6 M	9.7%	5.6 M
<b>Total</b>	<b>661.3 M</b>		<b>248.3 M</b>

Our ethanol operations are highly dependent on commodity prices, especially prices for corn, ethanol, distillers grains, non-food grade corn oil and natural gas. As a result of price volatility for these commodities, our operating results can fluctuate substantially. The price and availability of corn is subject to significant fluctuations depending upon a number of factors that affect commodity prices in general, including crop conditions, weather, federal policy and foreign trade. Because the market price of ethanol is not always directly related to corn prices (for example, crude and other energy prices can impact ethanol prices), at times ethanol prices may lag movements in corn prices and, in an environment of higher corn prices or lower ethanol prices, reduce the overall margin structure at the plants. As a result, at times, we may operate our plants at negative or marginally positive operating margins.

We expect our ethanol plants to produce approximately 2.8 gallons of denatured ethanol for each bushel of grain processed in the production cycle. We refer to the difference between the price per gallon of ethanol and the price per bushel of grain (divided by 2.8) as the “crush spread”. Should the crush spread decline, it is possible that our ethanol plants will generate operating results that do not provide adequate cash flows for sustained periods of time. In such cases, production at the ethanol plants may be reduced or stopped altogether in order to minimize variable costs at individual plants.

We attempt to manage the risk related to the volatility of commodity prices by utilizing forward grain purchase and forward ethanol, distillers grains and corn oil sale contracts as management deems appropriate. We attempt to match quantities of these sale contracts with an appropriate quantity of grain purchase contracts over a given period of time when we can obtain an adequate gross margin resulting from the contracts we have executed. However, the market for future ethanol sales contracts generally lags the

spot market with respect to ethanol price. Consequently, we generally execute fixed price contracts for no more than four months into the future at any given time and we may lock in our corn or ethanol price without having a corresponding locked in ethanol or corn price for short durations of time. As a result of the relatively short period of time our contracts cover, we generally cannot predict the future movements in the crush spread for more than four months; thus, we are unable to predict the likelihood or amounts of future income or loss from the operations of our ethanol facilities. We utilize derivative financial instruments, primarily exchange traded commodity future contracts, in conjunction with certain of our grain procurement activities.

### **Future Energy**

During fiscal year 2013, we entered into a joint venture with Hytken HPGP, LLC (“Hytken”) to file and defend patents for eSteam technology relating to heavy oil and oil sands production methods, and to commercially exploit the technology to generate license fees, royalty income and development opportunities. The patented technology is an enhanced method of heavy oil recovery involving zero emissions downhole steam generation. We own 60% and Hytken owns 40% of the entity named Future Energy, LLC.

We have agreed to fund direct patent expenses relating to patent applications and defense, annual annuity fees and maintenance on a country by country basis, with the right to terminate funding and transfer related patent rights to Hytken. We may also fund, through loans, all costs relating to new intellectual property, consultants, and future research and development, pilot field tests and equipment purchases for commercialization stage of the patents. We have paid approximately \$1,724,000 cumulatively, including \$113,000 in fiscal year 2016 for our ownership interest, patent and other expenses.

### **Critical Accounting Policies and Estimates**

During the three months ended October 31, 2016, we did not change any of our critical accounting policies as disclosed in our 2015 Annual Report on Form 10-K as filed with the Securities and Exchange Commission on March 25, 2016. All other accounting policies used in preparing our interim fiscal year 2016 Consolidated Condensed Financial Statements are the same as those described in our Form 10-K.

### **Fiscal Year**

All references in this report to a particular fiscal year are to REX’s fiscal year ended January 31. For example, “fiscal year 2016” means the period February 1, 2016 to January 31, 2017.

## Results of Operations

### Comparison of Three and Nine Months Ended October 31, 2016 and 2015

The following table summarizes selected data from our consolidated operations for the periods presented:

	Three Months Ended October 31,		Nine Months Ended October 31,	
	2016	2015	2016	2015
Average selling price per gallon of ethanol	\$ 1.44	\$ 1.44	\$ 1.42	\$ 1.45
Gallons of ethanol sold (in millions)	62.8	57.3	182.5	171.0
Average selling price per ton of dried distillers grains	\$ 122.34	\$ 146.64	\$ 127.27	\$ 152.69
Tons of dried distillers grains sold	159,812	153,560	436,474	421,461
Average selling price per pound of non-food grade corn oil	\$ 0.29	\$ 0.26	\$ 0.27	\$ 0.27
Pounds of non-food grade corn oil sold (in millions)	17.6	15.4	49.7	43.8
Average selling price per ton of modified distillers grains	\$ 45.17	\$ 56.40	\$ 54.49	\$ 70.99
Tons of modified distillers grains sold	18,876	19,645	62,393	57,891
Average cost per bushel of grain	\$ 3.30	\$ 3.62	\$ 3.51	\$ 3.64
Average cost of natural gas (per mmbtu)	\$ 3.31	\$ 3.21	\$ 3.08	\$ 3.82

Net sales and revenue in the quarter ended October 31, 2016 were approximately \$116.3 million compared to approximately \$110.6 million in the prior year's third quarter, representing an increase of approximately \$5.7 million. Net sales and revenue in the first nine months of fiscal year 2016 were approximately \$332.2 million compared to approximately \$329.3 million in the first nine months of fiscal year 2015, representing an increase of approximately \$2.9 million.

The following table summarizes sales of our consolidated operations for each major product and service group for the periods presented (amounts in thousands):

Product Category	Three Months Ended October 31,		Nine Months Ended October 31,	
	2016	2015	2016	2015
Ethanol	\$ 90,702	\$ 82,767	\$ 259,266	\$ 248,329
Dried distillers grains	19,551	22,518	55,551	64,354
Non-food grade corn oil	5,074	3,994	13,658	12,002
Modified distillers grains	853	1,108	3,400	4,109
Other	103	197	337	467
Total	\$ 116,283	\$ 110,584	\$ 332,212	\$ 329,261

Ethanol sales increased from approximately \$82.8 million in the third quarter of fiscal year 2015 to approximately \$90.7 million in the third quarter of fiscal year 2016, primarily a result of an increase of 5.5 million gallons sold. Dried distillers grains sales decreased from approximately \$22.5 million in the third quarter of fiscal year 2015 to approximately \$19.6 million in the third quarter of fiscal year 2016, primarily a result of a \$24.30 decline in the price per ton sold. The decline in selling price was partially offset by a 4% increase in tons sold. Management believes the decline in the selling price results primarily from the ongoing uncertainty of Chinese imports of domestic dried distillers grains as the China Ministry of Commerce had announced an anti-dumping and countervailing duty investigation in January 2016 and has imposed an anti-dumping tariff and a countervailing duty on U.S. dried distillers grains exports to China that total approximately 45%. Non-food grade corn oil sales increased from approximately \$4.0 million in the third quarter of fiscal year 2015 to approximately \$5.1 million in the third quarter of fiscal year 2016, primarily a result of a 14% increase in pounds sold. Modified distillers grains sales decreased from approximately \$1.1 million in the third quarter of fiscal year 2015 to approximately \$0.9 million in the third quarter of fiscal year 2016, primarily a result of a \$11.23 decline in the price per ton sold.

Ethanol sales increased from approximately \$248.3 million in the first nine months of fiscal year 2015 to approximately \$259.3 million in the first nine months of fiscal year 2016, primarily a result of an increase of 11.5 million gallons sold. The volume increase was partially offset by a \$0.03 decline in the price per gallon sold. Dried distillers grains sales decreased from approximately \$64.4 million in the first nine months of fiscal year 2015 to approximately \$55.6 million in the first nine months of fiscal year 2016, primarily a result of a \$25.42 decline in the price per ton sold. The decline in selling price was partially offset by a 4% increase in tons sold. Management believes the decline in the selling price results primarily from the ongoing uncertainty of Chinese imports of domestic dried distillers grains discussed above. Non-food grade corn oil sales increased from approximately \$12.0 million in the first nine months of fiscal year 2015 to approximately \$13.7 million in the first nine months of fiscal year 2016, primarily a result of a 13% increase in pounds sold. Modified distillers grains sales decreased from approximately \$4.1 million in the first nine months of fiscal year 2015 to approximately \$3.4 million in the first nine months of fiscal year 2016 primarily a result of a \$16.50 decline in the price per ton sold.

We expect that sales in future periods will be based upon the following (One Earth and NuGen only):

Product	Annual Sales Quantity
Ethanol	240 million to 260 million gallons
Dried distillers grains	580,000 to 620,000 tons
Non-food grade corn oil	65 million to 75 million pounds
Modified distillers grains	70,000 to 90,000 tons

This expectation assumes that One Earth and NuGen will continue to operate at or near historical production levels, which is dependent upon the crush spread realized. NuGen has received the EPA pathway approval and has permits to increase its production levels to 150 million gallons annually. One Earth has received the EPA pathway approval and has permits to increase its production levels to 131 million gallons annually. We are working on debottlenecking the plants and plan to increase production levels over time dependent on industry conditions and plant profitability. We may vary the amounts of dried and modified distillers grains production, and resulting sales, based upon market conditions.

Gross profit for the third quarter of fiscal year 2016 was approximately \$20.2 million (17.3% of net sales and revenue) which was approximately \$5.9 million higher compared to approximately \$14.3 million of gross profit (12.9% of net sales and revenue) for the third quarter of fiscal year 2015. The crush spread for the third quarter of fiscal year 2016 was approximately \$0.31 per gallon of ethanol sold compared to the third quarter of fiscal year 2015 which was approximately \$0.19 per gallon of ethanol sold. The decline of approximately \$3.0 million in sales of dried distillers grain compared to the third quarter of fiscal year 2015 negatively affected gross profit. Management believes this decline results primarily from the continued uncertainty regarding Chinese imports of domestic distillers grains. Grain accounted for approximately 75% (\$72.5 million) of our cost of sales during the third quarter of fiscal year 2016 compared to approximately 77% (\$73.6 million) during the third quarter of fiscal year 2015. Natural gas accounted for approximately 6% (\$5.3 million) of our cost of sales during the third quarter of fiscal year 2016 compared to approximately 5% (\$4.9 million) during the third quarter of fiscal year 2015.

Gross profit for the first nine months of fiscal year 2016 was approximately \$45.9 million (13.8% of net sales and revenue) which was approximately \$4.2 million higher compared to approximately \$41.7 million of gross profit (12.7% of net sales and revenue) for the first nine months of fiscal year 2015. The crush spread for the first nine months of fiscal year 2016 was approximately \$0.20 per gallon of ethanol sold compared to approximately \$0.18 per gallon of ethanol sold during the first nine months of fiscal year 2015. Grain accounted for approximately 77% (\$221.3 million) of our cost of sales during the first nine months of fiscal year 2016 compared to approximately 76% (\$218.1 million) during the first nine months of fiscal year 2015. Natural gas accounted for approximately 5% (\$14.4 million) of our cost of sales during the first nine months of fiscal year 2016 compared to approximately 6% (\$17.5 million) during the first nine months of fiscal year 2015. Given the inherent volatility in ethanol, distillers grains, non-food grade corn oil, grain and natural gas prices, we cannot predict the likelihood that the spread between ethanol, distillers grains, non-food grade corn oil and grain prices in future periods will be consistent compared to historical periods.

We attempt to match quantities of ethanol, distillers grains and non-food grade corn oil sale contracts with an appropriate quantity of grain purchase contracts over a given period of time when we can obtain a satisfactory margin resulting from the crush spread inherent in the contracts we have executed. However, the market for future ethanol sales contracts generally lags the spot market with respect to ethanol price. Consequently, we generally execute fixed price sales contracts for no more than four months into the future at any given time and we may lock in our corn or ethanol price without having a corresponding locked in ethanol or corn price for short durations of time. As a result of the relatively short period of time our contracts cover, we generally cannot predict the future movements in the crush spread for more than four months. Based on existing contracts at the end of the third quarter of fiscal year 2016, approximately 2% of our forecasted ethanol, approximately 14% of our forecasted distillers grains and approximately 17% of our forecasted non-food grade corn oil production during the next 12 months have been sold under fixed-price contracts. The effect of a 10% adverse change in the price of ethanol, distillers grains and non-food grade corn oil from the current pricing would result in a decrease in annual revenues of approximately \$45.4 million for the remaining forecasted sales. Similarly, approximately 1% of our estimated corn usage for the next 12 months was subject to fixed-price contracts. The effect of a 10% adverse change in the price of corn from the current pricing would result in an increase in annual cost of goods sold of approximately \$29.1 million for the remaining forecasted grain purchases. Approximately 3% of our estimated natural gas usage for the next 12 months was subject to fixed-price contracts. The effect of a 10% adverse change in the price of natural gas from the current pricing would

result in an increase in annual cost of goods sold of approximately \$2.0 million for the remaining forecasted natural gas purchases.

Selling, general and administrative expenses for the third quarter of fiscal year 2016 were approximately \$5.1 million, compared to approximately \$4.7 million for the third quarter of fiscal year 2015. The quarterly increase is primarily related to higher incentive compensation which is consistent with the higher profitability in the third quarter of fiscal year 2016 compared to the third quarter of fiscal year 2015. Selling, general and administrative expenses for the first nine months of fiscal year 2016 were approximately \$14.3 million, compared to approximately \$15.6 million for the first nine months of fiscal year 2015. The year to date decrease is primarily related to lower incentive compensation which is consistent with the lower profitability in the first nine months of fiscal year 2016 compared to the first nine months of fiscal year 2015. Lower professional fees in fiscal year 2016 also contributed to the decline in year over year expenses. We expect selling, general and administrative expenses to remain consistent with fiscal year 2015 results in future periods, with the exception of variability of incentive compensation which is based upon Company profitability.

During the third quarters of fiscal years 2016 and 2015, we recognized income of approximately \$1.8 million and \$1.3 million, respectively, from our equity investment. During the first nine months of fiscal years 2016 and 2015, we recognized income of approximately \$3.3 million and \$7.9 million, respectively, from our equity investment. Effective June 1, 2015, a merger between Patriot and CHS occurred in which our ownership interest in Patriot was sold; thus we ceased recording income from Patriot using the equity method of accounting. Big River has interests in four ethanol production plants and has an effective ownership of ethanol gallons shipped in the trailing twelve months ended October 31, 2016 of approximately 355 million gallons. Big River's results in fiscal year 2016 have been negatively impacted from commodity pricing and related hedging activities. Due to the inherent volatility of the crush spread, we cannot predict the likelihood of future operating results from Big River being similar to historical results.

During the first quarter of fiscal year 2016, we received proceeds of approximately \$2.3 million as partial payment for certain escrow holdbacks and adjustments to the purchase price related to the merger between Patriot and CHS. As a result, we recognized approximately \$0.2 million as gain on sale of investment during the first quarter of fiscal year 2016. At October 31, 2016, we have approximately \$2.3 million in accounts receivable on the accompanying Consolidated Condensed Balance Sheet related to estimated escrow proceeds that were previously recognized as income. We expect that a determination of the final payment of escrowed proceeds to be received will occur by December 31, 2016.

On June 1, 2015, Patriot and a subsidiary of CHS completed a merger that resulted in CHS acquiring 100% of the ownership interest in Patriot. We received a cash payment of approximately \$45.5 million at the closing, representing our proportionate share of the merger proceeds. The total merger consideration was approximately \$196 million in cash subject to certain adjustments and certain escrow holdbacks. In connection with this transaction, we recognized a gain of approximately \$10.4 million during the second quarter of fiscal year 2015.

Gain on disposal of property and equipment was insignificant for both the third quarters and first nine months of fiscal years 2016 and 2015. We expect gain on disposal of property and equipment to be insignificant for the remainder of fiscal year 2016.

Interest and other income was insignificant for both the third quarters and first nine months of fiscal years 2016 and 2015. We expect interest and other income to remain consistent with fiscal year 2015 levels for the remainder of fiscal year 2016.

As a result of the foregoing, income before income taxes was approximately \$17.2 million for the third quarter of fiscal year 2016 versus approximately \$11.1 million for the third quarter of fiscal year 2015. Income before income taxes was approximately \$35.7 million for the first nine months of fiscal year 2016 versus approximately \$45.3 million for the first nine months of fiscal year 2015.

Our effective tax rate was 33.3% and 14.8% for the third quarters of fiscal years 2016 and 2015, respectively, and 32.9% and 28.1% for the first nine months of fiscal years 2016 and 2015, respectively. The fluctuation in the effective tax rate primarily relates to the release of valuation allowances against capital loss carryforwards, the domestic production activities deduction, a change in the apportionment of income to certain states, the expiration of statutes for years with uncertain tax positions and a decrease in state income tax rates. These items reduced the effective tax rate approximately 17% for the quarter ended October 31, 2015 and approximately 7% for the nine months ended October 31, 2015. The provision for uncertain tax positions increased the effective tax rate approximately 1.9% and 1.4% for the quarter and nine months ended October 31, 2016, respectively. We expect our effective tax rate to approximate 30-35% (gross of noncontrolling interests) in future periods.

As a result of the foregoing, net income was approximately \$11.5 million for the third quarter of fiscal year 2016 versus approximately \$9.4 million for the third quarter of fiscal year 2015. Net income was approximately \$24.0 million for the nine months of fiscal year 2016 versus approximately \$32.6 million for the first nine months of fiscal year 2015.

Income related to noncontrolling interests was approximately \$2.5 million and approximately \$2.0 million during the third quarters of fiscal years 2016 and 2015, respectively, and was approximately \$4.0 million and approximately \$4.8 million during the first nine months of fiscal years 2016 and 2015, respectively. These amounts represent the owners' (other than us) share of the income or loss of NuGen, One Earth and Future Energy.

As a result of the foregoing, net income attributable to REX common shareholders for the third quarter of fiscal year 2016 was approximately \$8.9 million, an increase of approximately \$1.4 million from approximately \$7.5 million for the third quarter of fiscal year 2015. Net income attributable to REX common shareholders for the first nine months of fiscal year 2016 was approximately \$20.0 million, a decrease of approximately \$7.8 million from approximately \$27.8 million for the first nine months of fiscal year 2015. The decrease from the year to date fiscal year 2015 period primarily relates to the sale of Patriot in fiscal year 2015 and the inclusion of five months of income in fiscal year 2015 using the equity method of accounting for our investment in Patriot.

## Liquidity and Capital Resources

Net cash provided by operating activities was approximately \$41.4 million for the first nine months of fiscal year 2016, compared to approximately \$21.8 million for the first nine months of fiscal year 2015. For the first nine months of fiscal year 2016, cash was provided by net income of approximately \$24.0 million, adjusted for non-cash items of approximately \$9.7 million, which consisted of depreciation and amortization, income from equity method investments, gain on disposal of real estate and property and equipment, net, gain on sale of investment and the deferred income tax provision. We received dividends from Big River of approximately \$4.0 million during the first nine months of fiscal year 2016. An increase in the balance of accounts receivable used cash of approximately \$1.7 million, which was primarily a result of the timing of customer shipments and payments. An increase in the balance of inventories used cash of approximately \$2.3 million, which was primarily a result of the timing of receipt of raw materials as we took advantage of purchasing opportunities that existed during the third quarter of fiscal year 2016. A decrease in the balance of other assets provided cash of approximately \$2.8 million, as prior year overpayments of income taxes were used to reduce estimates of our current year liabilities. An increase in the balance of accounts payable provided cash of approximately \$1.7 million, which was primarily a result of the timing of inventory receipts and vendor payments. An increase in the balance of other current liabilities provided cash of approximately \$3.2 million which was primarily a result of higher accruals for our income tax provision.

Net cash provided by operating activities was approximately \$21.8 million for the first nine months of fiscal year 2015. For the first nine months of fiscal year 2015, cash was provided by net income of approximately \$32.6 million, adjusted for non-cash items of approximately (\$12.6) million, which consisted of depreciation, impairment charges and amortization, income from equity method investments, gain on sale of investment and gain on disposal of real estate and property and equipment and the deferred income tax provision. Dividends received from our equity method investees were approximately \$7.6 million in the first nine months of fiscal year 2015. An increase in the balance of accounts receivable used cash of approximately \$2.3 million, which was primarily a result of the timing of customer shipments and payments. An increase in the balance of inventories used cash of approximately \$5.5 million, which was primarily a result of the timing of receipt of raw materials. An increase in the balance of accounts payable provided cash of approximately \$4.9 million, which was primarily a result of the timing of inventory receipts and vendor payments. Other liabilities decreased approximately \$2.8 million, which was primarily a result of the payments of accrued payroll and incentive compensation balances.

At October 31, 2016, working capital was approximately \$183.9 million, compared to approximately \$159.7 million at January 31, 2016. The ratio of current assets to current liabilities was 9.4 to 1 at October 31, 2016 and 9.1 to 1 at January 31, 2016.

Cash of approximately \$7.6 million was used in investing activities for the first nine months of fiscal year 2016, compared to cash provided of approximately \$37.8 million during the first nine months of fiscal year 2015. During the first nine months of fiscal year 2016, we had capital expenditures of approximately \$11.8 million, primarily related to improvements at the One Earth and NuGen ethanol plants. We expect to spend between \$2.0 million and \$3.0 million during the remainder of fiscal year 2016 on various capital projects. During the first nine months of fiscal year 2016, we received approximately \$2.3 million as partial payment for certain escrow holdbacks and adjustments to the purchase price related

to the sale of our equity investment in Patriot. We received approximately \$1.5 million of proceeds from the sale of three real estate properties during the first nine months of fiscal year 2016.

Cash of approximately \$37.8 million was provided by investing activities for the first nine months of fiscal year 2015. During the first nine months of fiscal year 2015, we had capital expenditures of approximately \$9.9 million, primarily related to improvements at the One Earth and NuGen ethanol plants. The sale of our equity investment in Patriot provided cash of approximately \$45.5 million during the first nine months of fiscal year 2015. During the first nine months of fiscal year 2015, we sold three real estate properties that generated approximately \$1.9 million of proceeds.

Cash used in financing activities totaled approximately \$6.8 million for the first nine months of fiscal year 2016 compared to approximately \$60.7 million for the first nine months of fiscal year 2015. During the first nine months of fiscal year 2016, we used cash of approximately \$4.7 million to purchase approximately 95,000 shares of our common stock in open market transactions. During the first nine months of fiscal year 2016, we used cash of approximately \$2.1 million to purchase shares from and pay dividends to noncontrolling members of One Earth and NuGen. We expect additional such payments of approximately \$1.7 million for the remainder of fiscal year 2016. During the first nine months of fiscal year 2015, we used cash of approximately \$60.1 million to purchase approximately 1,045,000 shares of our common stock in open market transactions. During the first nine months of fiscal year 2015, we used cash of approximately \$0.6 million to purchase shares from noncontrolling members of One Earth.

We are investigating various uses of our excess cash. We have a stock buyback program, and given our current authorization level, can repurchase a total of approximately 155,000 shares. We also plan to seek and evaluate other investment opportunities including organic plant expansion, other energy related, agricultural or other ventures we believe fit our investment criteria.

Effective April 1, 2016, One Earth and NuGen each entered into \$10.0 million revolving loan facilities that mature April 1, 2017. Any borrowings will be secured by assets of One Earth or NuGen. These revolving loan facilities are recourse only to One Earth and NuGen and not to REX American Resources Corporation or any of its other subsidiaries. Borrowings under these facilities bear interest at the one month LIBOR rate plus 250 basis points. Neither One Earth nor NuGen had outstanding borrowings on the revolving loans as of October 31, 2016. One Earth and NuGen are also subject to certain financial covenants under the revolving loan facilities, including working capital requirements, should they borrow on the loans. The specific covenant requirements, descriptions and calculated ratios and amounts at October 31, 2016 are as follows:

- Maintain working capital of at least \$5 million.

At October 31, 2016, working capital at One Earth and NuGen was approximately \$70.4 million and \$51.7 million, respectively.

One Earth and NuGen were in compliance with all covenants, as applicable, at October 31, 2016.

#### **Forward-Looking Statements**

This Form 10-Q contains or may contain forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. Such statements can be identified by use of forward-looking

terminology such as “may,” “expect,” “believe,” “estimate,” “anticipate” or “continue” or the negative thereof or other variations thereon or comparable terminology. Readers are cautioned that there are risks and uncertainties that could cause actual events or results to differ materially from those referred to in such forward-looking statements. These risks and uncertainties include the risk factors set forth from time to time in the Company’s filings with the Securities and Exchange Commission and include among other things: the impact of legislative changes, the price volatility and availability of corn, distillers grains, ethanol, non-food grade corn oil, gasoline, natural gas, ethanol plants operating efficiently and according to forecasts and projections, changes in the national or regional economies, weather and the effects of terrorism or acts of war. The Company does not intend to update publicly any forward-looking statements except as required by law. Other factors that could cause actual results to differ materially from those in the forward-looking statements are set forth in Item 1A of the Company’s Annual Report on Form 10-K for the fiscal year ended January 31, 2016 (File No. 001-09097).

### **Item 3. Quantitative and Qualitative Disclosures About Market Risk**

We are exposed to the impact of market fluctuations associated with commodity prices as discussed below.

We manage a portion of our risk with respect to the volatility of commodity prices inherent in the ethanol industry by using forward purchase and sale contracts. At October 31, 2016, One Earth and NuGen combined have forward purchase contracts for approximately 7.6 million bushels of corn, the principal raw material for their ethanol plants. One Earth and NuGen expect to take delivery of the corn through February 2017. At October 31, 2016, One Earth and NuGen have combined sales commitments for approximately 29.6 million gallons of ethanol, approximately 94,000 tons of distillers grains and approximately 12.3 million pounds of non-food grade corn oil. One Earth and NuGen expect to deliver the ethanol, distillers grains and non-food grade corn oil through January 2017. Approximately 2% of our forecasted ethanol sales during the next 12 months have been sold under fixed-price contracts. As a result, the effect of a 10% adverse move in the price of ethanol from the current pricing would result in a decrease in annual revenues of approximately \$37.4 million. Approximately 14% of our forecasted distillers grains sales during the next 12 months have been sold under fixed-price contracts. As a result, the effect of a 10% adverse move in the price of distillers grains from the current pricing would result in a decrease in annual revenues of approximately \$6.4 million. Approximately 17% of our forecasted non-food grade corn oil sales during the next 12 months have been sold under fixed-price contracts. As a result, the effect of a 10% adverse move in the price of non-food grade corn oil from the current pricing would result in a decrease in annual revenues of approximately \$1.7 million. Similarly, approximately 1% of our estimated corn usage for the next 12 months was subject to fixed-price contracts. As a result, the effect of a 10% adverse move in the price of corn from the current pricing would result in an increase in annual cost of goods sold of approximately \$29.1 million. Approximately 3% of our estimated natural gas usage for the next 12 months was subject to fixed-price contracts. As a result, the effect of a 10% adverse move in the price of natural gas from the current pricing would result in an increase in annual cost of goods sold of approximately \$2.0 million.

### **Item 4. Controls and Procedures**

Our management evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures, as of the end of the period

covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

There were no changes in our internal control over financial reporting that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## **PART II. OTHER INFORMATION**

### **Item 1. Legal Proceedings**

We are not party to any legal proceedings that we believe would, individually or in the aggregate, have a material adverse effect on our financial condition, results of operations or cash flows.

### **Item 1A. Risk Factors**

During the quarter ended October 31, 2016, there have been no material changes to the risk factors discussed in our Annual Report on Form 10-K for the year ended January 31, 2016.

### **Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

#### Dividend Policy

REX did not pay dividends in the current or prior years. We currently have no restrictions on the payment of dividends. Our consolidated and unconsolidated ethanol subsidiaries have certain restrictions on their ability to pay dividends to us. During the first nine months of fiscal year 2016, One Earth and NuGen paid dividends to REX of approximately \$5.1 million and \$5.8 million, respectively.

### **Item 3. Defaults upon Senior Securities**

None

### **Item 4. Mine Safety Disclosures**

None

### **Item 5. Other Information**

None

### **Item 6. Exhibits**

The following exhibits are filed with this report:

- 31 Rule 13a-14(a)/15d-14(a) Certifications
- 32 Section 1350 Certifications
- 101 The following information from REX American Resources Corporation Quarterly Report on Form 10-Q for the quarter ended October 31, 2016, formatted in XBRL: (i) Consolidated Condensed Balance Sheets, (ii) Consolidated Condensed Statements of Operations, (iii) Consolidated Condensed Statements of Equity, (iv) Consolidated Condensed Statements of Cash Flows and (v) Notes to Consolidated Condensed Financial Statements.

## SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

REX American Resources Corporation  
Registrant

**CERTIFICATIONS**

I, Zafar Rizvi, certify that:

1. I have reviewed this quarterly report on Form 10-Q of REX American Resources Corporation;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

---

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
